INTRODUCTION

This report has been prepared by the Manitoba Bureau of Statistics (MBS) as part of its economic statistics program. Its purpose is to provide information for Manitoba on the importance and impact of trade at both the interprovincial and international levels. Interprovincial trade data and all constant dollar values are MBS estimates and are not available from any other source. The information on international trade is from Statistics Canada's External Trade Division but MBS has adjusted some of this data (specifically grain, oilseeds and other selected commodities) to better reflect Manitoba's trade position.

The merchandise trade statistics are also perfectly integrated with the MBS Manitoba Economic Accounts. This feature protects the users from having to reconcile what are, at times, conflicting pieces of evidence on the merchandise trade.

The Manitoba Bureau of Statistics has available additional detailed information which can be supplied to interested users on a cost recovery basis. For further information, please contact Roy Ellis at MBS (204-945-2994).

The Manitoba Bureau of Statistics should be credited when quoting any part of this document.

EXECUTIVE SUMMARY

Manitoba's economy is very heavily dependent on trade. In 1986 merchandise exports and imports (international and interprovincial) were 34.1 percent and -40.2 percent respectively of Manitoba's Gross Domestic Product (GDP). In contrast, merchandise exports and imports were only 29.5 and -24.9 percent respectively of Canada's GDP during the same period.

In 1986, Manitoba's merchandise exports to the rest of the world were $2,299 million. The value of imports was $2,854 million which resulted in Manitoba having a trade deficit of $555 million dollars. Manitoba's merchandise trade with the rest of Canada was also in a deficit position with the value of exports of $2,842 million being exceeded by the value of imports of $5,032 million by $2,190 million.

When measured in constant 1981 dollars (constant dollar measures removed the effect of price increases and therefore reflect the volume of trade) Manitoba's real trade surplus with the rest of the world was $215 million and the deficit with the rest of Canada was $1,168 million in 1986.

The relative importance of trade with the rest of the world has been increasing since 1981. In 1981, exports to the rest of the world accounted for only 38.1 percent of total exports, by 1986 it had increased to 44.7 percent.

Manitoba's foreign trade is weighted in the favour of primary industries. Exports to the rest of the world from primary industries (agriculture, forestry, fishing, hunting and trapping and mining) in 1986 were 41.4 percent of total exports and all primary industries with the exception of fishing, hunting and trapping had positive trade balances. Agriculture alone had a positive trade balance of $689.3 million. Exports of manufactured goods accounted for 52.2 percent of all exports but manufactured goods were also 93.2 percent of all imports. This resulted in a trade deficit in manufactured goods of $1.5 billion in 1986.

Manitoba's total merchandise exports reached a value of $5,141 million in 1986. This represented a fall of 5.1 percent from the 1985 level of $5,416 million. After adjusting for price increases the value of real exports was $5,290 million, an increase of 2.4 percent over 1985.
